# SAMOA GROUP

For 18 years we have been offering a steadily growing portfolio of rain ponchos. Eight years ago, this resulted in the development of the first worldwide sustainable and certified rain poncho made from GMO-free plant starch, a 100% biodegradable & compostable material. Numerous other organic products and brands have been created since the original BIO-rain poncho.

Today, we are the largest worldwide supplier of a wide range of organic rain ponchos and other organic products. Our entire BIO range is made from plant starch and is certified according to the European (EN 13432), the American (ASTM D6400) and the Australian (AS 4736-2006) standard. All our BIO-products are 100% biodegradable and compostable.

The SAMOA Group consists of the following brands:

## Samoa Regenponchos

The weather cannot be influenced, we know! So, what can be done? You can take precautions with practical and promotional rainwear from „Samoa Regenponchos!“ For 18 years we have been supplier and specialist when it comes to rainwear, offered in various designs, materials, colours and thicknesses, individually printed or unprinted, in stock or specially produced.

## BIO-Regenponchos

For the love of nature, a piece of nature, braving the rain with a good conscience. As a contribution to environmental protection and sustainability, we were the first to develop the BIO-rain poncho from plant starch 8 years ago. The entire range is marketed under the brand „BIO-rain ponchos“ and is an environmentally friendly alternative to the traditional plastic materials.

## BIO-Bags

With „BIO-Bags“ we also offer you plant starch-based shopping bags in many designs, sizes and thicknesses.

## BIO-Bang

With „BIO-Bang“ we present you the world novelty - the BIO-bang bang sticks made from plant starch! You can express your loud support effectively, safely and in a resource conserving way at every sporting event.

## BIO-Solutions

With „BIO-Solutions“ we offer you various merchandising articles made from plant starch to advertise with sustainability in mind!

# CERTIFICATES

For SAMOA GROUP as a supplier, sustainability is not just a buzzword, it's a true corporate philosophy. With our awards and certificates, both at the company and production level, we assume responsibility towards employees, suppliers, customers and society.

## BSCI

As a certified member of the BXCI platform we guarantee that the national and international laws regarding social aspects and environmental protection are complied with our own production, as well as in the production of our suppliers.

## ISO 9001

ISO 9001 is the global standard for quality management, and our manufacturer's certification demonstrates a commitment to delivering reliable, defect-free products. This rigorous framework ensures we follow best practices in every process, from design to delivery.

## SGS

Our products have been awarded the "SGS" test report (Société générale de Surveillance). The "SGS" test report recognizes products that undergo a declaration of commitment and thus promise that the product will be subject to a pollution-free production.

## OK Compost

All of our BIO-products have been tested and have been awarded the "OK Compost" seal of quality by TÜV AUSTRIA Group. The seal of approval states that our BIO-products are made from the biodegradable substance - plant starch - and that they are 100% biodegradable and compostable according to the European Standard EN 13432. Compostable and biodegradable refers to the CO<sub>2</sub> neutral degradation in an incinerator, industrial composting and proper disposal as compost in your own garden.

Our "OK Compost" certificate number S0187 not only refers to the products themselves but also to the printing ink used to print the logos, the masterbatch colours used to dye the material and other features.

## LDPE RAIN PONCHO STANDARD PRINTED

ART.NO.: 2001

You cannot influence the weather - not even with the greatest prayers to heaven. With the LDPE emergency rain poncho or disposable rain poncho, you can at least be well prepared. This model has been around for years. Offered at open air events this poncho enjoys great popularity. The simple cut and the generous wide fit helps to ensure that this poncho protects everyone well from the rain. Although it is often referred to as emergency / disposable rain poncho, it can be reused several times.

- Snap buttons on both sides

## BIO-Products in detail

With our BIO-products you buy promotional items with a good conscience. For the love of nature, a piece of nature!

Our BIO-products are a sustainable, resource-efficient and environmentally friendly alternative to commonly used plastic products. They are reusable several times, water-resistant, breathable, food-safe and can be decomposed CO<sub>2</sub>-neutrally.

All our BIO-products are made from GMO-free renewable plant raw materials. They are certified with the "OK Compost" quality seal according to the EU Standard EN 13432. This means they are 100% biodegradable and compostable.

But, not only the raw material and finished BIO-products, additionally also the ink for printing, masterbatch ink for dyeing the material are certified and 100% biodegradable and compostable. The "OK Compost" quality seal was issued to us in 2017 by TÜV AUSTRIA. The test procedure for obtaining the quality seal is based on the internationally recognized EU Standard EN 13432.

What does 100% biodegradable and compostable mean? It means that the material decomposes CO<sub>2</sub>-neutrally into its natural occurring, renewable and non-toxic starting substances (H<sub>2</sub>O + CO<sub>2</sub>). This happens during an active degradation process. The degradation process takes place either in an industrial composting plant within 8 to 12 weeks, or slowly in the in-house compost, with the help of microorganisms or enzymes and heat. The other option for CO<sub>2</sub>-neutral break down is the incineration in a waste incineration plant.

Another benefit is that even the degradability of products made from plant raw materials in the ocean has been tested and confirmed by the EU's initiated "Environmental Technology Verification" program. The break down time is 35-39 weeks.

All our BIO-products can be stored up to 2 years in a dry environment, protected from light and at an appropriate storage temperature. Afterwards a natural, passive and slow decomposition process begins.

**NEW!**  
We have opened a production facility in Ukraine. From now on, our BIO-rain ponchos can also be produced in this brand new production site in the western part of Ukraine. Delivery time is 3-4 weeks. Minimum order quantity is 1.000 pcs. Next to our main Chinese production we are now able to offer you European produced BIO-rain ponchos.

## BIO-RAIN PONCHO® STANDARD NATURAL-COLOURED & PRINTED ART.NO.: 4001

This certified and natural-coloured BIO-rain poncho is made from GMO-free plant starch. It is 100% biodegradable & compostable. It is the counterpart to the classic concert emergency rain poncho made from plastic and can be reused several times too. With our environmentally conscious BIO-rain poncho you will not only stay dry during any outdoor activity, but have a good conscience and advertising effectiveness as well.
